

About Pro-System

For over 20 years Pro-System has been developing, testing, manufacturing, and selling high performance brake systems.

Our technical sales and engineering team has years of experience working on and driving race cars with many professionals.

Pro-System has dedicated machinery to manufacture and test our brake systems. We design and build our brake testing dynamometers which are used by many professional racers and teams. Every rotor and brake pad are pre-bedded so there is no work for you after installation. Pro-System was the first to pre-bed brake pads and rotors and are still the leader in this service.

Pro-System is committed to supplying the best engineered brake kits in the market. All of our kits are tested, tuned, developed, and quality checked before leaving our facility.

Pro-System is part of the Alcon Performance Engineering Group.

About Alcon

Alcon was established in 1983 by engineer and sports car racer John Moore in order to make brakes for Audi Sport's Group B Quattro rally cars.

Today the company provides braking solutions for the top echelons of motorsport, all from our factory and HQ in Tamworth, UK. Our distributor network stretches across the globe, making Alcon accessible wherever you are.

For more information on any of the work that we do, don't hesitate to contact one of our sales representatives.
